WORK EXPERIENCE

Reality AI Lab

Dec 2024 - Present

Software Developer:

Remote

- Developed and refined full-stack architectures for Marvel AI and Sky AI, supporting a **50% increase in user engagement** through intuitive ReactJS front-ends and scalable Node.js/Python back-ends.
- Deployed and optimized applications on Google Cloud Run, achieving **99.9% uptime** and reducing load times by **20%**, ensuring real-time responsiveness.
- Managed structured and unstructured data (Firestore, Firebase, Redis), resulting in a **30% improvement in data retrieval speeds** for AI workflows.
- Implemented CI/CD pipelines via GitHub Actions, **reducing deployment time by 15%**, and contributed to AI innovations like real-time recommendation systems.

Cod soft

Mar 2024 - Jul 2024

Remote

- Software Engineer Intern
- Developed and deployed 3 web applications using JavaScript and React, improving user engagement by 25%.
- Collaborated with a team of 5 to optimize existing codebases, reducing page load times by 30%.
- Conducted testing and debugging on various platforms, achieving a 98% bug-free rate before deployment.
- Assisted in the implementation of Agile methodologies, leading to a 15% increase in project delivery speed.

Upwork

Mar 2024 - Jul 2024

Remote

- Software Engineer
- Engineered and maintained 10+ client-facing applications, contributing to a 40% increase in client satisfaction scores.
- Designed and implemented RESTful APIs, improving data retrieval speeds by 50% and reducing server load.
- Led a project team of 3 to enhance system security protocols, resulting in a 100% compliance rate with industry standards.
- Analyzed user feedback and performance metrics, facilitating iterative improvements that boosted application performance by 35%.

SpaceX

May 2020 - Nov 2023

Hawthorne, CA

- Propulsion Technician
- Utilized advanced software to monitor and analyze propulsion test data, increasing test efficiency by 20%.
- Collaborated with engineers to interpret data and generate reports, enhancing the accuracy of test results by 15%.
- Executed over 30 propulsion tests, ensuring adherence to safety and quality standards with zero incidents.
- Developed training materials for new technicians, reducing onboarding time by 25% and improving team productivity.

EDUCATION

- Bachelors of Science, Computer Science
- California State University Fullerton California State University Fullerton, 3.4Gpa
- Bachelors of Science Business Admin, Information Systems.
- California State University Dominguez Hills, 3.4GPA
- Achievements:** Languages: C++, R programming
- Coursework:** Algorithms and Complexity, Data Structures, Object Oriented programming, Discrete Mathematics
- Coursework:** Networks, System Analysis and Design, Database Systems, Data Communications, Business programming

Dec 2018

May 2024

TECHNICAL SKILLS

- PROGRAMMING LANGUAGES:** JavaScript, TypeScript, Python, C++, Sass, SQL, HTML5, CSS3
- FRAMEWORKS & LIBRARIES:** React, Node.js, jQuery, Bootstrap, CI/CD
- TOOLS & SOFTWARE:** MongoDB, Git, GitHub, AWS, Figma, Firebase
- Other Skills:** Excel, MS Excel, Data Visualization, Data Analysis

PROJECTS

AWA Tech Info Systems

Aug 2023 - Dec 202

- Built a robust database application utilizing Google Firebase for real-time data synchronization and SQL for efficient data querying and manipulation.
- Employed HTML, CSS, and JavaScript with jQuery to create an intuitive and responsive user interface, enhancing user interaction and experience.
- Implemented a user authentication form that collects email and password credentials using a POST method, allowing for secure sign-in and validation against server-side user data.
- Integrated Excel spreadsheets for data automation and utilized Google Aps Script for custom scripting, streamlining workflows and improving app functionality.

Pac-Man Video Game

- Implemented game logic and user input handling using JavaScript.
 - Enhanced type safety and code maintainability with Rescript.
 - Used arrays for the game board, objects for entities, and queues for ghost movement.
