EDUCATION

California State University Dominguez Hills

M.S. Systems Engineering.

Carson, CA

Expected June 2028

Relevant Coursework: The Practice of Systems Engineering, Introduction to Systems Engineering, Introduction to Systems Engineering II, Analytics in Systems Engineering

California State University Dominguez Hills

B.S. Business Administration: Information Systems.

Carson, CA

Graduated May 2024

PROJECTS

FPV Drone System Engineering & CONOPS

github.com/aakorGithub/FPV-Drone-Systems-Engineering

Systems Engineering Project

- Architected end-to-end Concept of Operations (CONOPS) and System Context diagrams using Mermaid and system modeling tools for remote visual inspection in GPS-denied and confined spaces.
- Developed system constraints, assumptions, and stakeholder needs matrices to ensure solution-neutral requirement flow-down from problem definition to mission execution.
- Conducted functional boundary mapping across ground control, communication links, data consumers, and airspace regulatory bodies.

EXPERIENCE

Propulsion Technician

Feb 2020 – Nov 2021

SpaceX

Hawthorne, CA

- Assembled, installed, and tested propulsion systems and components in support of launch vehicle integration.
- Tracked proof testing and analyzed engine stress test data using DAQ software for Starship engine components at SpaceX's Texas R&D facility, with approximately 80% of components passing proof testing.
- Inspected engine components using micrometers, calipers, and laser marking equipment for precision measurement and part marking, handling cleanroom hardware under strict contamination control and quality standards.
- Supported engine build, system integration, and launch pad preparation across multiple mission lifecycles.

EHS Safety Technician

Jan 2026 – Jul 2026

Primoris, ARB Inc

Indio, CA

- Conducted daily safety audits on a utility-scale solar project, ensuring compliance and reducing recordable incidents by 30%.
- Reviewed 600+ trench permits, risk assessments, JHAs, and STAR cards weekly, preventing permit-related incidents.
- Investigated 20+ incidents, implemented corrective actions, and reduced repeat violations by 25%.

EHS Safety Specialist

Feb 2023 – Nov 2025

Schultz Industrial Services

Carson, CA

- Monitored confined space entry operations and enforced OSHA compliance in high-consequence refinery environments.
- Coordinated safety coverage across work crews during maintenance shutdowns and active refinery operations.
- Reduced incident rate for fire, falls, and other high-consequence hazards by 80% through proactive hazard recognition and protocol enforcement.

AFFILIATIONS

International Council on Systems Engineering (INCOSE)

Los Angeles, CA

Member, Los Angeles Chapter

SKILLS

Systems Engineering: Requirements Specification, Verification & Validation, Systems Lifecycle Processes, MBSE, SysML, Cameo, IBM DOORS, Agile, JIRA

Technical Tools: MATLAB, Simulink, SolidWorks, Python, C++, DAQ Software, SQL

Safety & Compliance: EHS Compliance, Hazard Recognition, OSHA Protocols, LOTO, Root Cause Analysis, Hazardous Energy Control, Permit Management, HazCom, Hot Work & Fire Safety, InteleX

Productivity: MS Word, Excel, PowerPoint, Outlook, MS Project, Project Management
